

Geography Intent

The Geography curriculum is designed to give all students the confidence and experience to help inform and shape ideas; investigating human and physical strands of the multi-faceted subject. This will enable students to become global citizens and have the cultural literacy to be role models for the future and set a trail for others to emulate. Considering themes such as sustainability, development and climate change in their everyday lives.

Geography offers the opportunity to study a range of topics that investigate the physical processes of our planet, human societies and the economic and environmental challenges within the local, national and global context. This gives students the confidence to interact with the wider world, leading to fulfilled and positive life experiences. The curriculum encourages students to ask questions, develop critical thinking skills, and layer a deeper understanding of complex concepts as the course navigates through the curriculum.

Geographical skills are embedded within units of work throughout all key stages. Students develop their cartographic, graphical, ICT and GIS skills. Fieldwork enquiries enable students to apply their skills, knowledge and understanding within both human and physical Geography.

Geography bridges the curriculum from the physical process in Science, creativity in English to the quantitative skills of Mathematics. Students are able to use these connections to excel in the wider world.
